SynchronizedExample With Counter:->

```
Counter.java:->
```

```java
package com.example.demo;

public class Counter {
    private int count=0;
    public synchronized void  increment()
    {
        count++;
    }
    public int getCount()
    {
        return count;
    }
}
```

```
MainTest.java:->
```

```java
package com.example.demo;

public class MainTest {
    public static void main(String[] args) {
        Counter counter = new Counter();
        Thread thread1 = new Thread(() -> {
            for (int i = 0; i < 1000; i++) {
                counter.increment();
            }
        });
        Thread thread2 = new Thread(() -> {
            for (int i = 0; i < 1000; i++) {
                counter.increment();
            }
        });
        thread1.start();
        thread2.start();

        try {
            thread1.join();
            thread2.join();
            System.out.println("final value of count:" + counter.getCount());
        } catch (InterruptedException e) {
            throw new RuntimeException(e);
        }
    }
}
```
