ThreadCreationExample:->

```
MyThread.java:->
```

```
package com.example.demo;

public class MyThread extends Thread{

    @Override
    public void run() {
        System.out.println("Thread is running...");
    }
}
```

```
MyTest.java:->
```

```
//        MyThread myThread=new MyThread();
//        myThread.start();
//        System.out.println("Thread is started");
```

```
MyRunnable.java:->
```

```
package com.example.demo;

public class MyRunnable implements Runnable{
    @Override
    public void run() {
        System.out.println("Creating thread with runnable:Thread is
running");
    }
}
```

```
MyTesty.java:->
package com.example.demo;

public class MyTest {
    public static void main(String[] args) {
//        MyThread myThread=new MyThread();
//        myThread.start();
//        System.out.println("Thread is started");
        MyRunnable myRunnable=new MyRunnable();
        Thread myThread=new Thread(myRunnable);
        myThread.start();
        System.out.println("Thread is started");
    }
}
```
